The Use of Metaverse for Military Training

Tufan Ekin

Faculty of Computer and Information Sciences

Abstract

The use of simulation for military training before Metaverse will be introduced. Main technologies that can be used for military training will be discussed. Examples of how Metaverse is used for military training by different countries will be mentioned. Application areas of Metaverse and advantages provided by Metaverse applications in the military domain will be covered. Additionally, an idea about the use of Metaverse for naval training will be presented.
