

MANAGEMENT INFORMATION SYSTEMS

We aim to train as an expert who will lead in designing and developing the most appropriate information systems in line with the requirements of enterprises and providing communication between information scientists and business administrators.

In the future, you can see yourself as a

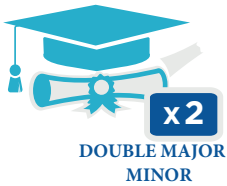

- system designer and administrator,
- network administrator,
- database expert
- web designer,
- software and program developer,
- information security expert

You can apply for program certificates when you have taken courses prepared in consultation with some of the best in the sector; Oracle, SAP, Microsoft and Cisco!

As a result of your internship, you will get to know real life in the field, and your contact with the industry will come back to you as a job offer...

By doing a Double Major or Minor in an interdisciplinary program, you will strengthen your knowledge and experience.

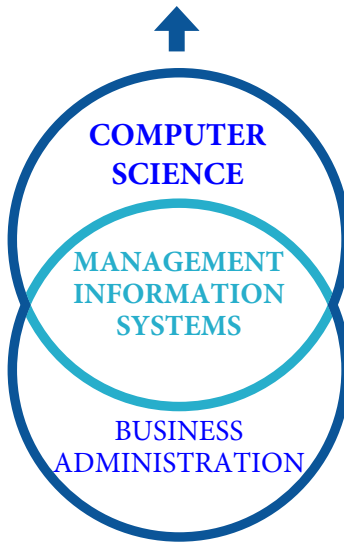

DOUBLE MAJOR
MINOR

In addition to English, our language of instruction, a second foreign language that you can choose will enhance your opportunity to work abroad!

or in a similar position involving information technologies.

In addition to a strong IT infrastructure, you'll be equipped with information about accounting, management and organization concerning business administration!

You'll gain experience by participating in Erasmus programs at universities in the Netherlands, Germany, Austria, France, Sweden, Spain, Poland; or in exchange programs at universities in the USA and Canada!
